Get ready to learn and have fun through this hands-on introduction to electric circuits. This distance learning program will allow participants, grades 4-9, an opportunity to explore, problem-solve, think critically and be creative. Registration will be open January 2 - 24. All participants will receive program supply kits from their county offices prior to the start of the program. This program will begin on March 1 with guided lessons and tutorials. **Registration is open until January 24th.**
