

## Dodge County Master Gardener Association (DCMGA)

DCMGA is a network of individuals dedicated to horticulture.

DCMGA holds a monthly educational program that is free and open to the public. The **July 24, 2025** meeting will focus on **Exploring Invasive Species**. The educational meetings are normally held at Moraine Park Technical College, Beaver Dam. However, this July meeting will be held at **The Horicon Marsh Education Center at N7725 Highway 28, Horicon. Please meet at the Center's front entry at 6:00 p.m. to participate in an outside walking meeting. Please dress appropriately for the walk.** You can find a list of all of the topics available in 2025 at <https://www.dodgecountymga.com/>. See below for more details about the upcoming presentation.

## EXPLORING INVASIVE SPECIES

### Presenter

Matt Wallrath works in the Renz Weed Lab as the Wisconsin First Detector Network Coordinator at the University of Wisconsin - Madison. Matt is an invasive species expert with decades of experience in both field and policy work on this topic.

Please join us at The Horicon Education Marsh Education Center to hear Matt discuss how Wisconsin regulates and manages invasive plants. Learn about existing state rules on invasive species, apps to help identify invasive species, learn how to report invasives, and become aware of resources for monitoring and control.

We hope to see you there at 6:00 p.m. for an outside educational walk as we learn together.
